Profile

Currently, I am a student in the Pre, final year and my passion lies in technology, with a continuous desire for growth. I want to find a challenging, long, term mentorship opening through which I can deep dive into the field of professional software development. Since I live close by, I can easily dedicate a lot of time and energy to learning and working together face, to, face. I am enthusiastic about going beyond the classroom and gaining a niche skillset aligned with industry standards.

Education

B.E. Computer Science & Engineering (2023 - 2027)

NEW HORIZON COLLEGE OF ENGINEERING (Affiliated to VTU) | Bengaluru, Karnataka

YEAR: 3rd Year

CGPA: 9.05/10

Skills

Programming languages: C, C++, Python, SQL

Projects Completed

1. Dark Sensing Robot:

Worked on a prototype of a dark sensing robot with my team which has potential applications in performing tedious tasks in the dark.

2. Weather Information Website:

Worked on the HTML coding of a weather information website with my peers. Gained insights on the usage of HTML and API requests.

3. Handwritten Text to Digital Text Converter:

Worked on a Java application with OCR capabilities of handwriting digitization and improving recognition accuracy through preprocessing techniques.

Projects Ongoing

1. Walsmart AI:

Working on an AI-powered e-commerce assistant that uses conversational AI for intelligent search, real-time personalized recommendations, and AR features for virtual product try-ons to deliver a seamless shopping experience.

Certifications (Posted on LinkedIn)

1. **Crash Course on Python by Google**
Gained insights on the fundamentals of the programming language and their implementation
2. **QUANTUM X-24 Ethical Hacking**
Attended a workshop during the technical fest of NHCE, QUANTUM-X. Gaining insights on the field of cyber security, the skill set and the potential opportunities.
3. **Foundations of Cybersecurity by Google**
Understood the significance of the field and various roles of security analyst, learning core basics about the types of threats that are to be defended.
4. **Workshop on Fundamentals of AI**
Explored the essentials of running open-source models like Llama 3 locally using Ollama. We also covered practical steps for building AI applications with Python, LangChain, and Streamlit, including creating prompt templates and chaining them together.
5. **Generative AI Mastermind**
Attended a 16-hour intensive mastermind program focused on prompt engineering, AI automation, custom chatbot development, and practical use of generative AI tools to enhance workflows and presentations.
6. **NPTEL Fundamentals of Artificial Intelligence**
Attended a 12-week course on the types of AI agent architectures and specific algorithms used by agents to solve problem statements, also learnt a few basic concepts of machine learning.
At the end I achieved an **Elite Silver Certification** through a proctored offline exam.

Extra-Curricular Activities:

- Volunteered for Merck Internship Drive August 2025
- Participated in a walkathon to EmpowerHER by Child Rights and You (CRY)
- Participated in a walkathon by an NGO Aashwasan Foundation "Hope For Life" to help support the organization's voices and goals.
- Attended a 2 Day Symposium on Data for Public Good at IISC Bengaluru understanding the new effort to put together a community for making anonymized quality data available to develop solutions for public good like CDPG.
